

PROGRAM OVERVIEW

The Climate Change Studies program prepares students with a comprehensive understanding of climate change; analytical and interdisciplinary skills for climate change research and practice; and an understanding of global perspectives, community engagement, and justice in climate change. The Climate Change Studies program offers B.S. and B.A. degrees and three tracks (e.g., natural sciences, society, and policy) that include a range of courses across multiple departments, colleges, and schools at CU Denver.

ACADEMIC ADVISING

The College of Liberal Arts and Sciences (CLAS) supports students to graduation using a shared advising system. CLAS students have two academic advisors with whom they should meet regularly to discuss academic and degree progress: a CLAS Academic Advisor and a major advisor.
