

PROGRAM OVERVIEW

Political science focuses on fundamental questions that go to the heart of the human experience. Political science students study critical issues such as war and peace, international affairs, environmental challenges, poverty and racism, and the struggles of oppressed peoples. Such study prepares students for various careers by building analytical and writing skills while encouraging independent thought, respect, and interest in current affairs. Graduates commonly work in fields such as law and government, nonprofit organizations, teaching, journalism, international organizations, business, and election campaigns.

The Public Policy track was designed for students who specifically desire to pursue careers in public policy and/or public administration in the public or nonprofit sectors. This track emphasizes the specifically political aspects of public policy processes, settings and is grounded in basic political science theory and familiarity with American, Comparative and International politics. Courses will emphasize key policy issues confronting U.S. local, state and national decision makers and citizens. A focus on politics and the policy-making process will prepare students conceptually and methodologically to move beyond partisan politics to address how leaders can best mobilize resources to achieve constituent goals consistent with the public interest.

ACADEMIC ADVISING

The College of Liberal Arts and Sciences (CLAS) supports students to graduation using a shared advising system. CLAS students have two academic advisors with whom they should meet regularly to discuss academic and degree progress: a CLAS Academic Advisor and a major advisor.
