PROGRAM OVERVIEW

Biology is the study of life, and integrative biology emphasizes the study and understanding of living organisms at different levels of organization, from molecular biology to biosphere ecology. We teach biology students core information that serves as a foundation for advanced study and professional training. This basic knowledge includes concepts central to our understanding of molecular biology, as well as the relationship between structure and function, and the genetic mechanisms of inheritance. In addition, biology students are educated in cell biology and genetics, as well as the technological breakthroughs that have led to discoveries in these fields. They learn how organisms adapt to diverse environments and about energy flow and nutrient cycles through ecosystems, worldwide biodiversity and how ecological function can be altered by human impacts.

The Organisms to Ecosystems Track caters to students interested in pursuing careers in conservation biology, wildlife biology, ecology, evolution and organismal biology. Students in this track may pursue careers at state and federal land agencies (NPS, USFWS, BLM, etc.), natural history museums and botanical gardens, zoos and aquariums, the veterinary field, organismal and ecology research, environmental education, environmental consulting, nonprofit advocacy and law, and graduate programs. Consider pairing this major with the Geographic Information Science Certificate.

ACADEMIC ADVISING

The College of Liberal Arts and Sciences (CLAS) supports students to graduation using a shared advising system. CLAS students have two academic advisors with whom they should meet regularly to discuss academic and degree progress: a CLAS Academic Advisor and a major advisor.

For questions related to CU Denver Core Curriculum, CLAS, general graduation requirements, university/college academic policies, or campus resources contact:

**CLAS Academic Advising**
clas_advising@ucdenver.edu
Visit the CLAS Advising website [here](#)
North Classroom (NC) 1030
303-315-7100

For questions related to major requirements, major course prerequisites, or evaluation of transfer coursework in your major contact:

**Biology Major Advising**

GENERAL GRADUATION REQUIREMENTS & POLICIES

All CU Denver CLAS students are required to complete the following minimum general graduation requirements to be eligible to apply for graduation:

1. Complete a minimum of 120 credit hours
2. Achieve a minimum 2.0 CU cumulative grade point average (GPA)
3. Complete a minimum of 45 upper-division (3000- to 4000-level) credit hours
4. Complete all CU Denver Core, CLAS, and major requirements
5. Complete a minimum of 30 CLAS credit hours with letter grades at CU Denver

The following are **maximum** credit hours that can apply toward the minimum 120 credit hours required for graduation:

- 16 credit hours Pass/Fail
- 12 credit hours of Independent Study/Directed Research
- 12 credit hours of internship credit
- 8 credit hours of physical education credit

PROGRAM REQUIREMENTS & POLICIES

**Students are responsible for meeting with the major advisor to confirm major requirements.** In addition to completing all CU Denver Core and CLAS requirements, students completing the Biology Organisms and Ecosystems B.S. Degree are required to complete the following minimum program requirements:

1. Students must complete a total of 51 credit hours, including a minimum of 36 BIOL credit hours and 15 credit hours in ancillary coursework.
2. Students must complete a minimum of 18 upper division (3000-level and above) BIOL credit hours.
3. Students must earn a minimum grade of C- (1.7) in all courses that apply to the major and must achieve a minimum cumulative major GPA of 2.0. Courses taken using P+/P/F or S/U grading cannot apply to major requirements.
4. Students must complete a minimum of 18 upper division (3000-level and above) BIOL credit hours with CU Denver faculty and at least 6 credits must be at 4000-level.
5. Upper division BIOL courses more than ten years old will not count automatically to the Major, but can be evaluated individually for their current relevance to the degree program through a petition process with the Department of Integrative Biology Curriculum Committee. Approval for courses older than ten years is not guaranteed so students may be required to update their knowledge by taking additional courses when past courses are outdated.
6. Undergraduate students may count up to six credit hours of independent study or internship (any combination of BIOL 3840 Independent Study, BIOL 3939 Internship, BIOL 4840 Independent Study, BIOL 4880 Directed Research) toward the upper-division Biology electives requirement in the major.

LYNXCONNECT RESOURCES

Are you interested in learning about internship, study abroad, career, and research opportunities for this major? Visit the CU Denver LynxConnect, located in Tivoli Student Union (TV) Suite 339, and browse the LynxConnect [website](#) for more information.

### Upper Division Biology Electives

Complete an additional 16 credit hours of upper-division biology including:

1. Two upper-division level (3000 or higher) BIOL lab courses (BIOL 3020 will not satisfy this requirement) or one upper-division level (3000 or higher) BIOL lab course and an experiential learning class (i.e., BIOL 3840, BIOL 3939, or BIOL 4840) and
2. Two three-credit hour 4000-level BIOL courses from CU Denver Biology faculty and
3. Two upper division (3000-level and above) BIOL courses to complete the minimum 36 BIOL credits required

**Ancillary Coursework:**

<tr>
<td>MATH 1401, MATH 4830 or BIOL 3763</td>
<td>Complete one of the following quantitative courses:</td>
<td>3 - 4</td>
</tr>
<tr>
<td>ENGL 4175, ENGL 3154, ENGL 4280, ENGL 4180 or COMM 4550</td>
<td>Complete one of the following writing intensive courses:</td>
<td>3</td>
</tr>
</tbody>
</table>

**Estimated General Electives** | 0 - 20 | 

**Total Minimum Credit Hours:** | 120 | 45 credit hours must be upper-division
## SAMPLE ACADEMIC PLAN OF STUDY

The following academic plan is a sample pathway to completing degree requirements for this major. Students should tailor this plan based on previously completed college coursework (e.g., AP, IB, CLEP, dual/concurrent enrollment, and transfer credit), course availability, and individual preferences related to course load, schedules, or add-on programs such as minors or double-majors.
