Dear colleagues,

Last fall, at the direction of Chancellor Michelle Marks, we formed a Digital Strategy Task Force of 18 community members from across campus, representing faculty, staff, students, and every school and college, to create a vision for our campus-level digital strategy. Guided by our [2030 Strategic Plan](#) and our deep expertise in this space, this digital vision positions CU Denver to be a “university for all” for learners of all backgrounds, careers, and ages—and to be a digital leader in Colorado and beyond.

Over the past five months, Task Force members engaged with the campus community, internal and external data sources, and relevant scholarly and market research to develop a set of recommendations to guide and support the process of addressing the needs of both opportunity and priority. We have also collaborated with related groups and initiatives—including our Computing Across the Curriculum Task Force and our Strategic Enrollment Management team—to ensure effective alignment and implementation.

We are pleased to announce that we have completed our report and presented our findings to Chancellor Marks on March 29. Now, we want to share it with you.

One Size Fits One: An Equity-Serving Institution

Our student body is enormously diverse. Half of our undergraduate students are students of color and half are first-generation. Half of our undergraduate students transfer into CU Denver from other institutions. One-third of our learner population is graduate students. Many of our learners work while pursuing their education. In examining the needs of our unique learner population, we developed our vision to encompass some core commitments: flexibility, accessibility, and inclusivity. To achieve these commitments, we must focus on affordability, innovation, and relevance. As a national leader in our field, we have developed four key themes and recommendations:

1. Shrink the gaps that are keeping students from achieving our digital vision's goal.
2. Develop a hybrid campus model to ensure a more consistent student experience that prioritizes equitable, personalized support.
3. Coordinate the efforts of our student community, partners, and universities to achieve key outcomes.
4. Create more effective and efficient models for designing and launching leading-edge stackable degrees, credentials, and certificates.

Top our list of immediate priorities, we will be completing a classroom audit that informs a roadmap for technology upgrades and infrastructure to support flexible modalities, and increasing faculty training and instructional design support.

What We've Learned and Where We Want to Go

As higher education continues to evolve, our campus conversation about the future of our digital strategy could not have come at a better time. We have learned many valuable lessons about online learning during the past two years of the pandemic, and we continue to gather information on how best to serve our learners with flexibility and hybridity in mind. Together, we are ready to build on a strong foundation of experience and knowledge in digital teaching and learning to create the vision for how best to support our current and future learners and how to empower our faculty and staff in our digital evolution.

Over the next few weeks, we will be prospectively reaching out to a number of committees across campus to share the findings and recommendations from the Digital Strategy Task Force report and to hear from you. If you want to schedule a meeting with Katie Linder to talk about the report findings, you can request a group session here. We will also host a Community Conversation on Digital Strategy on Tuesday, April 19 at 10:30 a.m. as another way to connect and provide more updates about our strategy, structure, and operations. We invite your participation in this important dialogue as we build our digital future together.

We'd like to thank the Task Force members for their time and dedication.

Tobin Biles | Associate Vice Chancellor | Fiscal Planning
Gabriel Canstaro | Associate Vice Chancellor | Strategic Enrollment and Student Success
Leo Darnell | Assistant Dean | College of Architecture and Planning
Dennis DeBey, PhD | Clinical Assistant Professor | School of Education & Human Development
Paula Dickson | Executive Director | Office of Institutional Research and Effectiveness
Jodi Dunlap, PhD | Professor | School of Education and Human Development
Lucy Dwight, PhD | Associate Professor, Clinical Teaching Track | School of Public Affairs
Jesse Estrada | Undergraduate Student | Psychology
Crystal Gaskell, EdD | IT Program Manager | Office of Information Technology
Mark Gallaher, PhD | Associate Dean and Professor | College of Engineering, Design and Computing
Brad Himon | Assistant Dean and Senior Instructor | School of Education and Human Development
Garrie John | Associate Vice Chancellor | Strategic Enrollment and Student Success
Karen Klimczak | Associate Vice Chancellor | University Communications
Jeff Merril | Instructor | College of Arts and Media
Ronald Ramirez, PhD | Associate Dean | Business School
John Tenold, PhD | Associate Professor | College of Liberal Arts and Sciences
Emile Wiegmann | First Year Experience Associate Director | Strategic Enrollment and Student Success
